I am a second-year Engineering student pursuing B.Tech in Artificial Intelligence and Data Science at VESIT. An aspiring Software Developer passionate about building impactful web applications and solving real-world problems. I have built multiple projects and am currently learning Java, practicing DSA daily and strengthening my web development skills while gradually exploring AI and Machine Learning. Actively seeking internship opportunities to learn, collaborate and grow as a developer.

EDUCATION:

Vivekanand Education Society's Institute of Technology

B.Tech in Artificial Intelligence and Data Science | First Year CGPA : 9.3

I.D.U.B.S Junior College

H.S.C 12th | Percentage : 78.67 %

Pawar Public School

I.C.S.E 10th | Percentage : 97 %

SKILLS:

Languages: Java, Python, JavaScript

Web Technologies: HTML5, CSS3, React.js, Tailwind CSS, Node.js

Databases: Firebase, Supabase, SQL

Tools: Git, GitHub, Vercel, Google Cloud Build

PROJECTS:

HomeVerse

[Live](#) | [GitHub](#)

A Community OS for apartments, hostels, and gated communities that modernizes residential living. Built role-based portals for residents, security, secretaries, managers, students, and wardens with visitor management, complaints, payments, marketplace, events, room management, attendance, notices, and community engagement.

Tech Stacks: React.js, Node.js, PostgreSQL, Tailwind CSS

Nexora

[Live](#) | [GitHub](#)

An AI-powered Tech Career Assistant that analyzes technical potential, creates personalized learning roadmaps, and provides mentorship, strategy, interview guidance, skill-gap analysis, and career insights through a unified intelligent platform.

Tech Stacks: React.js, Node.js, Firebase, Tailwind CSS

NovaLife

[Live](#) | [GitHub](#)

An AI-powered Productivity Operating System that acts as an intelligent digital Chief-of-Staff. Uses Gemini AI and Google Calendar integration to understand priorities, analyze deadlines, predict scheduling conflicts, and generate personalized execution plans for smarter daily productivity.

Tech Stacks: React.js, TypeScript, Express.js, Google Cloud Run

NutriBloom

[GitHub](#)

An AI-powered Nutrition Intelligence Platform that helps users discover healthy recipes, plan weekly meals, track calories, nutrition and water intake, generate smart grocery lists, and receive personalized AI-driven dietary insights through an interactive analytics dashboard.

Tech Stacks: React.js, Node.js, Firebase, Tailwind CSS

HACKATHONS:

- **SYRUS Hackathon (Top 6 Finalist)** | [Syrus Certificate](#)

Autonomous Onboarding Agent

[GitHub](#)

A modern, AI-driven onboarding platform designed to provide a seamless onboarding experience for new employees and an efficient management dashboard for HR teams.

- **UNIMERGE 1.0 Hackathon (Best UI/UX Winner)** | [UniMerge Certificate](#)

NoteNest

[GitHub](#)

An AI-powered Study Companion designed to make learning smarter and more interactive. Enables students to upload notes, generate AI-powered quizzes and summaries, chat with their study material, track learning progress, identify weak topics, and organize their preparation through a personalized dashboard.

- **Google Solution Challenge**

CrisisSync

[Live](#) | [GitHub](#)

A real-time crisis response and emergency coordination platform purpose-built for hospitality venues. It combines AI-powered incident classification, real-time multi-channel synchronization, and role-based command interfaces to transform how hotels, resorts, and event venues respond to emergencies.

- **FAR AWAY Hackathon**

Smart Tatkal Guardian

[Live](#) | [GitHub](#)

An autonomous multi-agent system that detects bot-driven Tatkal ticket hoarding in real-time and ensures genuine passengers get fair access to IRCTC Tatkal tickets.

- **Summer Hackathon Spectrum Circle** | [SpectrumCircle Certificate](#)

- **Hack-AI-Thon 4.0** | [Hack-AI-Thon 4.0 Certificate](#)

- **MoonShot Hackathon**

- **OpenAI Hackathon**

- **Invictus Hackathon**

- **Genesis Hackathon**

CERTIFICATIONS:

Gen AI (GOOGLE) | [Certificate](#)

Generative AI Foundations (Microsoft) | [Certificate](#)

Introduction to Machine Learning (IBM) | [Certificate](#)

Gemini Workspace (GOOGLE) | [Certificate](#)

ACHIEVEMENTS:

Google Study Jam | [Certificate](#)

Participated in the hands-on Google Cloud program designed to master cloud infrastructure, GenAI APIs, database management, and deployment strategies on Google Cloud Platform. Received Certificate and Goodies from Google Developer Groups.

Microsoft AI Skills Fest | [Badge](#)

Completed the Microsoft AI Skills Fest challenge, acquiring hands-on expertise in developing and deploying artificial intelligence solutions using Azure AI, Copilot, and Azure OpenAI Service.

OPEN SOURCE CONTRIBUTIONS:

InboxOS - An open-source AI Inbox Operating System.

[Live](#) | [GitHub](#)

InboxOS sits on top of your existing email provider and acts as a decision + execution layer. It understands every incoming email, prioritizes what matters, extracts deadlines and action items, and routes information to the right place automatically. An open-source AI Inbox Operating System.

Your inbox isn't just a list of emails. It's where your decisions, follow-ups, and context all collide and most tools treat it like a dumb list instead of a system. InboxOS was built to fix that..
